Key to Tables A.1 and A.2 columns:

Requirement:

No   A unique identifier for one row of the table which may be used to identify a requirement.

Essential requirements of Directive

Identification of article(s) defining the requirement in the Directive.

Clause(s) of the present document

Identification of clause(s) defining the requirement in the present document unless another document is referenced explicitly.

Requirement Conditionality:

U/C   "U" indicates that conformance with the clause is unconditionally required.
"C" indicates that conformance with the clause is required only if the specified condition is met.

Condition   For conditional requirements this column describes the condition that has to be met for conformance with the clause to be a requirement.

Assessment:

Indicates the clause of the present document that contains the relevant assessment method.

Presumption of conformity stays valid only as long as a reference to the present document is maintained in the list published in the Official Journal of the European Union. Users of the present document should consult frequently the latest list published in the Official Journal of the European Union.

Other Union legislation may be applicable to the product(s) falling within the scope of the present document.
